IIG F7 Machinery Technology

IIG MACHINERY

Accurate & Reliable Machinery

We control the quality not only check each single piece of spare part, but also simulate machine's actual working to check each spare part's fit precision during our installation, ensure our machines' best precision; thanks to the cooperation with the TUV Rheinland, ensure our machines' reliability.

Developmental Innovation & Research

With the increasing demands of plastic quality and quantity, injection molding factories required machines higher and higher, IIG F7 keeps the developmental innovation and research on predslon, efficiency safety and special material injection molding.

World-wide 7 x 24 Service

Since found our independent brand, IIG F7 established more than 20 international service network, we not only have the service network in Asia, South America, Africa, but also have the sales and service center in Europe, ensure the fastest local service for our customers.

Affordable Price

IIG F7 always insist to provide customers high quality equipment under the reasonable price, we have no intention to pursue unhealthy price competition to win the market, to ensure the company's benign and sustainable development; and provide the comprehensive service for customers.

Your Solution & Custom—made Partner

With the constant development of economy and society, customers demand more and more special and individual service; IIG F7 provide the "CUSTOM-MADE" service to help customers to be successful on high efficiency, high precision and cost saving, to reduce the investment risks.

Leading Technology

From 2006 to 2010, IIG F7 was an OEM team for EUROPEAN machines; years of OEM experience made IIG F7 controlled the core technology on high quality, high safety machine manufacturing, thus made our advantage on leading technology.

Experienced & Efficient Team

From OEM to independent brand business, IIG F7 deeply realized the importance of the team for a brand; the IIG F7 team is composed of experienced staff, whose average experience more than 15 years in this field; and all of departments keep timely and friendly communication for customers suggestions, discuss the improvement of design and installation.

OUR ADVANTAGES

> Near performance with world high level machine, with an easy affordable price, it's the key of success for IIG F7 series machine.

> We are almost harsh for quality, on IIG F7 machine, we required each bolt should be high strength , and this is the main reason of IIG F7 machine's outstanding performance.

> Only energy saving? IIG F7 is not so simple! For its outstanding performance, no matter labor, material or energy it will make you surprise. At the same time, it will help you highly improve your product quality, production efficiency, plant space using efficient and marketing competition.

> Energy Saving
Precision and energy saving servo system with optimized designed hydraulic circuit, the energy saving capacity is near with full-electric machine.

> Modularity
You can always come back for seconds, thanks to IIG F7 modular design upgrades and retrofits are a piece of cake.

> Individuality
We will custom-made your IIG F7 according to your menu and necessary, and our wide range options nearly covered all of your necessary.

> Cost—performance
IIG F7 not only has the near performance With world high level IMM, but price is easy affordable.

> User—friendly
Easy for operation, convenient for maintenance, IIG F7 makes everything easy.

> Stability

More than 20 years experience in this field, and several years OEM experience for world famous brands IMM, IIG F7 series can serve you perfect performance and stability.

> High speed

Fast response hydraulic system, sensitive controller system, and the best optimized mechanical system, highly improved machine's Cycle time.

> Clean

Maintenance free lubrication material used on adjustment system, linear guide rail for injective system, grease lubrication for movable platen, ensure a clean production environment for you.

> Reliability

All of hydraulic and electric parts adopt world top brands, the whole mechanical system's rigidity is much higher ' Chinese normal IMM, the key mechanical parts' suppliers same as world first-class IMM brands.

CLAMPING UNIT

- > Larger space between tie-bars. suitable for larger molds and multi-cavity necessary.
- > Longer and wider guide length, higher repeatability precision, improve product quality and mold working-life.
- > Upgraded parts, Graphite-copper bushes and slider used on tie-bar, ejector and movable platen, ensure fast and precise mold close and open.
- > Better designed mechanical structure and toggle system, faster cycle time, and improve production efficiency.
- > European type ejector structure, larger space, convenient for maintenance.
- > Prepared enough space for upgrade and retrofits.
- > Much higher rigidity mechanical system than normal Chinese IMM, not only improve machine's using-life, but also can protect mold.

INJECTION UNIT

- > Full supported injection unit with dual precise linear guide rails, ensure the best precision and fast start speed.
- > Dual carriage cylinders improve a better injection precision.
- > Injection unit steel pipes adopt pipe fitting to connect, no welding design ensure maintenance and after—service to be easier.
- > Upturning designed nozzle cover, production and maintenance to be easier.
- > Imported high quality SKD61 material screw tip, check ring and thrust ring; a lot kinds of screws design can meet different plastic material and special processing injection molding needs.

HYDRAULIC UNIT

- > Standard equipped with precise and energy saving servomotor system, energy saving capacity can reach to 20%~80% then traditional injection machine.
- > World famous brands hydraulic parts ensure machine's reliability and fast.
- > Response speed
- > Visible and dischargeable oil tank, easy for hydraulic circuit maintenance. Adopt modular adaptor valve blocks, hydraulic circuit and functions easy for available up—grade and maintenance.
- > Self-sealed magnetic suction filter, make your maintenance more convenient.
- > Logical distribution of pump oil suction port, oil tank oil outlet and hydraulic pipe fits, easy for maintenance
- > Germany DIN standard hydraulic pipe fitting with seal, G screw thread style plug, avoid oil pollution.

ELECTRIC UNIT

- > World well-known brands electric parts.
- > High quality large color screen controller, multi-language available
- > Standard equipped LED three-color tower light with alarm, machine working situation is clear.
- > Modernized network management function available.
- > Water proof rubber seal used on electric cabinet ensure high safety.
- > Machine program according to CE safety standard.

FUNCTION LIST

SERVICE EVERYWHERE- OUR IDEOLOGY FOREVER

Service along with IIG F7 actual core business, the manufacture and sales of machines. Marketing competition required increasing and extra value for Clients, service becomes more and more important. IIG F7 services all—around and from beginning to end, we serve to our Clients the complete before-sales consultation, in-sales support and after-sales service. No matter how long your machine used, our services are available throughout the machine's useful life for every client.

Circumspect Technology Team

Leadway technology team is well known more than 20 years in injection molding machine industry, we not only R&D machines which are popular in market, but also use our powerful technology to lead our clients to a higher efficiency, more saving and higher quality manufacturing area.

All—around Consultation Centre

Leadway technology team's core business: help clients to solve problems, provide turn—key projects and make solutions on projects. We analyze all the difficulties and give clients the suitable solutions, recommend clients the suitable machines. The whole solutions from economic and suitable machine, high precise and high efficiency machine to the marketing development trend machine, clients can choose one of them according to their buying ability and necessary.

Fast Service System

With IIG F7 modernized management system, we will try our fastest to inform our cooperation, agency or our frontline service personal the service requests, arrive at the scene at the first time to solve problems.

Considerate Training Service

Each Leadway's cooperation or agency area will offer our user the considerate training service; ensure our clients can comprehensive understanding, proper use and maintenance our machine. Senior engineers from Leadway headquarters will dispatched to visit our clients in fixed time, investigated Clients' use, and upgrade our machine according to clients' feedback, make our machine will be better to meet clients' needs.

Quick Global Delivery

A high quality service always depends on the suitable spare parts' delivery time, Leadway serve to our clients 7 days per week and 24 hours per day. There are enough normal parts stocks in our headquarters and our cooperation and agency area; for special parts, we will accept without delaying a single day, and try our utmost to deliver them, as quickly as possible so as to ensure the speedy restoration of clients' production.
